Response to Arguments

1. Applicant's arguments filed on Feb 1st 2002 have been fully considered but they are not persuasive. The claims are unpatentable as following:

Claim Rejections - 35 USC § 112

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is vague and indefinite as to what "Peltier device" is referring to? Applicant is required to provide documents or articles relate to such device.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawai et al (US 5279886).

Kawai teaches a ceramic heater comprised of heater electrode and a ceramic base layer (col 1 L 5-8).

The ceramic base layer is a sintered alumina body which is an oxide ceramic (col 2 L 13-20). A heater electrode is printed on the ceramic base layer and sintered simultaneously (col 2 L 11-13).

The ceramic heater after sintered has no open pores (col 6 L 1-10).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawai et al (US 5279886) in view of Ketcham (US 5338598).

Kawai discloses a ceramic heater comprised of a ceramic base layer and an electrode. The ceramic base layer is an alumina material or an oxide material. Kawai does not teach that the ceramic base layer can be a non-oxide, a carbide or a nitride material.

Ketcham teaches a composite article comprised of a sinterable ceramic material. The sinterable ceramic material includes an oxide ceramic, a non-oxide ceramic, aluminum nitride, carbides, etc. (col 4 L 65-col 5 L 6).

The sintered ceramic material exhibits zero open porosity (col 3 L 42-44).

Ketcham teaches many ceramic materials that can be used to make the composite article. Ketcham also teaches that any modification and variation can be done to achieve a desired article by one skill in the art (col 12 L 4-12).

Kawai is silent about having a Peltier device on the surface of the ceramic base layer.

It would have been obvious to include any electronic component(s) and/or device(s) on a ceramic substrate because it is conventional to do so.

Allowable Subject Matter

7. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
